NOTICE OF HEARING

A PUBLIC HEARING WILL BE HELD before the Arizona Power Plant and Transmission Line Siting Committee ("Committee") regarding the application of TEP for Certificates of Environmental Compatibility ("CEC") authorizing the construction of the Reciprocating Internal Combustion Engine Generation Project ("RICE Generation Project") and the Irvington 138 kV Transmission Line Relocation Project ("Transmission Line Project") (collectively, the "Projects").

The RICE Generation Project involves a new natural gas-fired, RICE generation plant located on the Irvington Campus at South Contractors Way and East Irvington Road in Tucson, Arizona. The RICE Generation Project is composed of ten (10) natural gas-powered units capable of producing approximately 20 megawatts ("MW") each, for a build-out total of 200 MW. RICEs are part of TEP's long-term resource plan and were identified in its Integrated Resource Plan filed with the Arizona Corporation Commission ("ACC") on April 3, 2017. The Transmission Line Project entails

1 the construction of new 138 kV transmission structures and 2.2 miles of new 138 kV transmission
2 line and 0.4 miles of repurposed line within the Irvington Campus. The new 138 kV substation
3 provides TEP with a more robust substation that can support the RICE Generation Project.
