

TEP Smart EV Charging Program: EV Installer Directory

Tucson Electric Power

This list provides information about companies who install EV chargers in TEP's service territory. Installers on this list have completed a training on TEP's Smart EV Charging Program, and as such are familiar with the program's requirements. Customers participating in the Smart EV Charging Program **do not have** to use an installer listed here. Instead, this list is meant to provide a starting point resource for customers looking for EV charger installers familiar with the Smart EV Charging Program. The EV charger installers on this list **are not endorsed by or formally affiliated with TEP**.

Want to refer an EV charger installer to the list? Please reach out to EVTEP@tep.com. Trainings are held quarterly based on demand. Customers utilizing the Smart EV Charging Program do not need to use an EV installer on this list, and may choose any licensed contractor to perform their installation.

¹ License numbers listed on this sheet were valid as of the date added to this list. Customers are encouraged to confirm their EV charger installer has an active license with the [Arizona Registrar of Contractors](#) before their project begins.

* Company participated in a previous version of the EV Installer Directory in 2020.
