

Santa Rita Connection Project

Tucson Electric Power (TEP) is preparing plans for new transmission facilities that will increase energy capacity and enhance system reliability for areas south of Tucson.

The Santa Rita Connection Project will interconnect TEP's existing 138 kilovolt (kV) transmission system to the proposed Santa Rita Substation, located east of I-19, between Sahuarita and Green Valley. This upgrade to TEP's local energy grid will strengthen the reliability of service to customers, support regional development, and provide greater capacity to support growing energy needs in the area.

We invite you to come to our in-person open house on November 13, 2025.

See the opposite side of this postcard for details.

Please submit your comments and questions by:

- Filling out an online comment form on the project webpage: www.tep.com/santa-rita-connection/
- Sending email comments to SantaRitaConnection@tep.com
- Calling 1-520-770-7520 and leaving a voicemail message
- Mailing a letter with comments to:

Tucson Electric Power (TEP) está preparando planes para nuevas instalaciones de transmisión que aumentarán la capacidad energética y mejorarán la fiabilidad del sistema para las áreas al sur de Tucson.

El proyecto de conexión de Santa Rita interconectará el sistema de transmisión existente de 138 kilovoltios (kV) de TEP con la subestación propuesta de Santa Rita, ubicada al este de la I-19, entre Sahuarita y Green Valley. Esta mejora de la red eléctrica local de TEP reforzará la fiabilidad del servicio a los clientes, apoyará el desarrollo regional y proporcionará una mayor capacidad para satisfacer las crecientes necesidades energéticas de la zona.

We Value Your Input

Valoramos su opinión

You can help shape our future energy grid.
Visit our website or join us at our
open house to learn how.
