

Tucson Electric Power

Aerospace Research Campus Transmission Project

Tucson Electric Power (TEP), in cooperation with community members and project stakeholders, has identified a potential route for a new transmission line that will serve Pima County's Aerospace Research Campus, supporting economic development and job creation in our community.

The Aerospace Research Campus Transmission Project will link TEP's existing 138 kilovolt transmission system to the proposed Franco Wash Switchyard located south of the Tucson International Airport. This upgrade will support new aerospace development and other supply chain industries planned for the 500-acre business campus with no impact on service reliability for other customers.

Under state law, TEP must secure a Certificate of Environmental Compatibility (CEC) from the Arizona Corporation Commission (ACC) before building the Project. The Arizona Power Plant and Transmission Line Siting Committee will review TEP's CEC application at a public hearing beginning Monday, Dec. 4, 2023 at 1 p.m. at the DoubleTree Tucson Airport, located at 7051 S. Tucson Blvd, Tucson, AZ 85756. The hearing will continue on Tuesday, December 5, 2023, beginning at 9 a.m.

Public comment will be taken in a special evening session on Dec. 4, 2023, beginning at 5:30 p.m., telephonically, virtually, or in person.

Comments also can be submitted throughout the hearing at the committee chairman's discretion. Please visit tep.com/aerospace-research-campus to learn how you can participate in the hearing, provide comments, review the CEC application and see a map of the proposed route and photographic simulations.

El Comité de Emplazamiento de Plantas de Energía y Líneas de Transmisión de Arizona examinará la solicitud del CEC de Tucson Electric Power para el Proyecto de Transmisión de Aerospace Research Campus en una audiencia pública a partir del lunes 4 de diciembre de 2023, a la 1 p.m. en el Hotel Doubletree Tucson Airport, ubicado en 7051 S. Tucson, Blvd. Tucson, AZ 85756. Se llevará a cabo una sesión especial para recibir comentarios del público, de manera telefónica, electrónica o en persona. El público podrá expresar sus comentarios durante la audiencia a discreción del presidente del comité. Visite tep.com/de-transmision-de-aerospace-research-campus para saber cómo puede participar en la audiencia de forma remota, proporcionar comentarios y ver una copia de la solicitud del CEC.
